

## **PRESS RELEASE - GIBSON ENERGY ULC TURNER GAS ACQUISITION**

July 2<sup>nd</sup>, 2009

**Mr. S. (Sam) van Aken, Sr. Vice President Propane Marketing and Distribution**, is pleased to announce, effective July 1, 2009, Link Petroleum Inc. (an affiliate of Gibson Energy and Canwest Propane) has acquired the wholesale propane business and assets of **Turner Gas's** Washington and Oregon operations.

A family-owned business, headquartered in Utah, Turner Gas has been marketing and distributing wholesale propane since 1939 throughout the Western United States.

Assets include six trucks, three tank trucks, six tankers, two large storage tanks and the business of supply and distribution of millions of gallons of propane annually to retailers in the Pacific Northwest.

The acquisition of this business, with Link's existing Surrey and Tacoma terminal infrastructure, will optimize operations. It will enhance business in Tacoma and significantly expand Gibson's wholesale propane marketing business in the region. This acquisition will create synergies with MP Energy (another Gibson/Canwest affiliate) on the supply side of the business; with Link Petroleum in the operations area, opportunities for further expansion will develop.

**Mr. G. (Glen) Willmott, Supervisor Marketing Logistics, Link Petroleum**, will oversee the integration of the Turner business and assets.

**Gibson's management and employees welcome the Turner Gas group to the Team and look forward to growing the business together.**

---

*Gibson Energy is a progressive Alberta-based company providing integrated oil and gas transportation, terminal and marketing services.*
